

# Photobiological Safety of Lamps Measurement System, 200-3000nm

Input Optic

Calibration Standard

Power Supply

Application

Determination of source irradiance 200-350nm

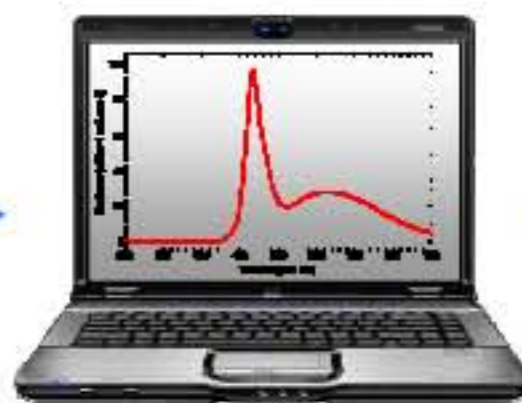

Determination of source irradiance 350-3000nm

*\* requires separate AC detection electronics*

Determination of source radiance 300-1400nm

BenWin+

Determination of 500k lux measurement distance
